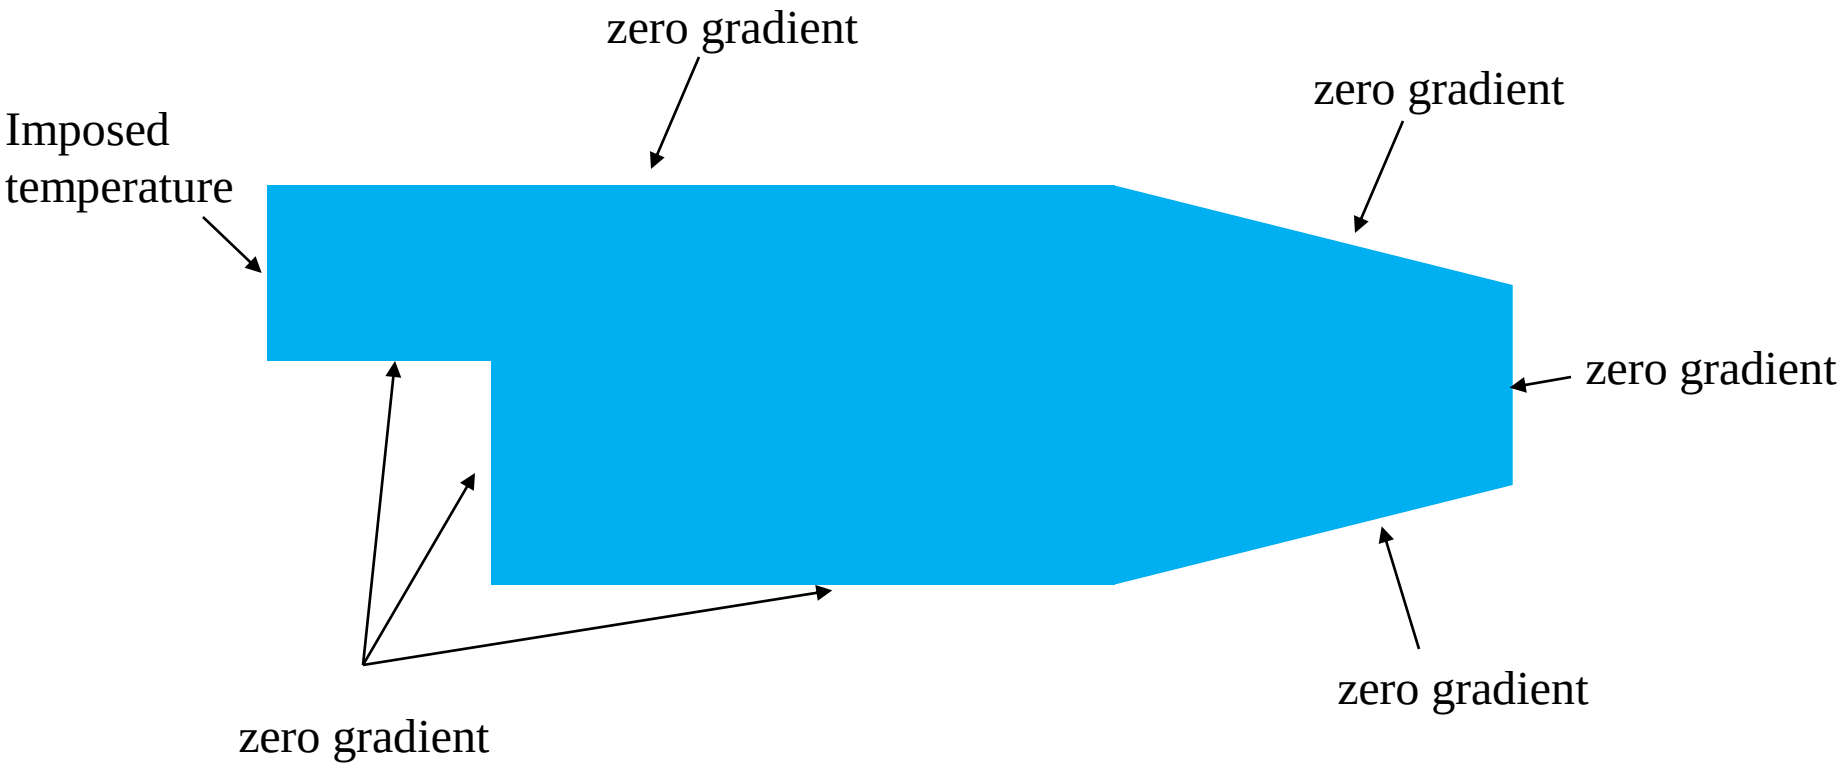
Copy the folders **basicTut** and **applications** to your personal area:

(/home/cesga/cursos/SHARED/basicTut)
(/home/cesga/cursos/SHARED/applications)

(cursos/curso**???**/OpenFOAM/curso**???**/basicTut)

Tutorial

Transport of a scalar (basic pitzDaily)



zero gradient
zero gradient
Imposed
temperature
zero gradient
zero gradient
zero gradient

BasicTut → scalarTransportFoam → pitzDaily

```
»blockMesh
»checkMesh
»scalarTransportFoam

»scalarTransportFoam >log &
»gnuplot Residuals
»paraFoam
```

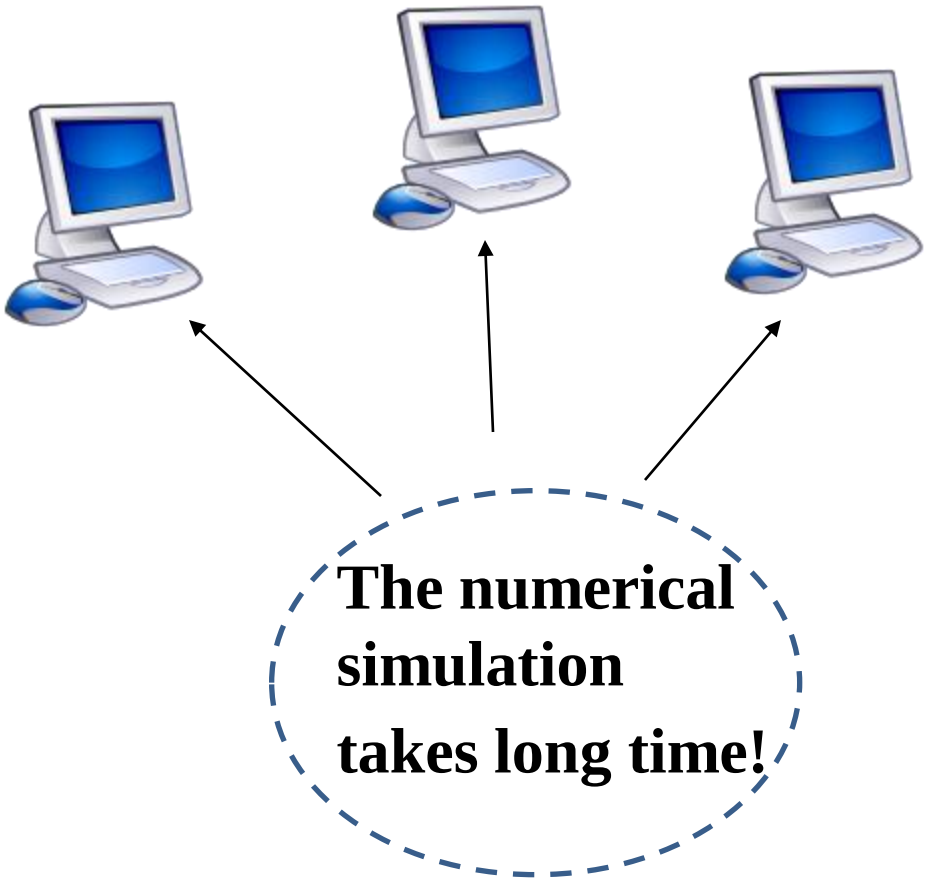
BasicTut → scalarTransportFoam → pitzDaily

```
»patchAverage T outlet

»patchAverage T outlet >logPatch

»patchIntegrate T outlet
```

Run in parallel:



Run in parallel:

BasicTut → scalarTransportFoam → pitzDaily

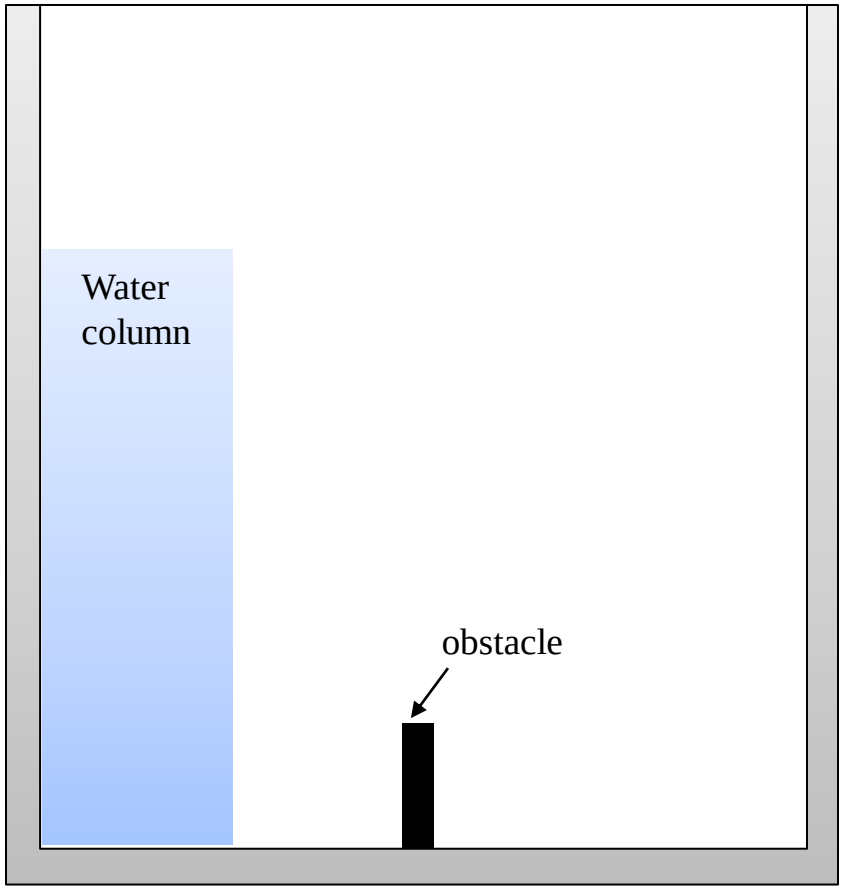
```
»decomposePar

»qsub … … …

»qstat
```

Tutorial

Break of a Dam



Water
column
obstacle

BasicTut → damBreak

```
»blockMesh
»checkMesh
»cp 0/alpha.water.org 0/alpha.water
»setFields
»interFoam
»paraFoam
```

Double the number of cells.

Run the simulation for 3 seconds.
